Week 5: User Account Management Report

Summary of findings:
As of 12:10pm on Monday, July 30, 2018, I was able to log into every instance except vandrea-agent1 and vandrea-agent2. I sent an email to the vandrea team to notify them that I was unable to log in, see information below. No teams had user information on their puppetmasters. Below you will see the instance I logged in to and the URL I used, if it was successful, it is stated beside the instance name, if not, I display the error given.

aarcher–agent1: Success

Below is the log information for my instance:

Note: I ran into issues logging into my instance on Saturday and ended up needing to change set up a new instance and attach the volume information to it, so any logins made or attempted prior to Saturday at 1pm are not recorded.
